

Together into the future

IRM is one of the leading providers of specialized software solutions for the simulation and controlling of extensive asset structures. Our core product is the Real Estate-Value Creator (RE-VC)[®], which supports our clients in all matters relating to asset, portfolio, risk and financial management as well as company planning and investment management. The users are investment companies, corporations and large portfolio holder in the real estate industry. Our passion is the continuous development of the most realistic possible cause and effect relationships to simulate future developments. We are proud of the trust placed in us by our customers for many years, who make their decisions and justify their actions on the basis of the analyzes, stress tests or the scenario comparisons.

With a mature product, renowned national and international customers and a future-oriented concept we are on a growth course. Design the future with us as

Real Estate IT-Project manager (m/f/d)

Responsibilities/Tasks

- Project management and/or assistance in software implementation in the areas of: Risk, Asset, Portfolio, Fund & Company Management as well as Controlling
- Key Account Management: Support of our customers and their RE-VC users in Europe and worldwide
- Option: Management & Abroad: Depending on the personal skills, the assumption of management tasks in project management as well as in global implementation projects is possible

Your Profile

- You have a qualified training or studies, ideally in the real estate industry, controlling, IT or business administration - other qualifications are not an exclusion criterion for us
- Experiences in planning and controlling within the real estate industry are advantageous but, however, not a prerequisite - applications from graduates of relevant subject area are also welcome
- The safe handling of MS Excel facilitates the understanding of our product's formulas
- Good German language skills are required for the consulting of our customers

We offer

- You can expect a modern working environment in an expanding company
- You work in a collegial team and in a pleasant atmosphere
- We offer an extensive design flexibility with flat hierarchies
- Variable working-time models and an attractive salary structure from the basis of our cooperation
